

# DrugReimbursement.com

**DrugReimbursement.com** is an online-coding reference tool that delivers search capability on essential FDA-approved drugs and related medical codes (CPT® codes, HCPCS Level II and National Drug Codes), billing, coverage and reimbursement information. Its drug coding and reimbursement database is updated bi-monthly, providing the most up-to-date reimbursement information available for HCPCS Level II codes and CPT® drug codes.

National Drug Codes (NDCs), HCPCS Level II codes and CPT® codes related to drugs are displayed with clickable reference, crosswalk, edit and payment icons that assist in improving drug coding and billing accuracy.

Features such as a search results grid, code detail page and drug detail page help users manage the complicated task of coding, billing and paying for brand and generic drugs, radiopharmaceuticals, self-administered and other drugs.

Users in pharmacy, HIM, coding and billing compliance, chargemaster management, and claims adjudication and pricing can easily and efficiently access detailed drug data to:

- **Save research time.** Provides complete, up-to-date crosswalk of FDA approved drugs to CPT®/HCPCS codes, and current average wholesale price (AWP), current wholesale acquisition price (WAC) and Medicare Part B payment rates.
- **Improve billing and chargemaster accuracy.** Detailed drug data identifies packaging and billable units, related NDCs, strength, ingredients, therapeutic class and other details. Special icons alert you to new, revised or deleted codes and quantity issues.
- **Determine medical necessity and coverage under Medicare.** Each CPT® code or HCPCS Level II code is linked to applicable national coverage determinations (NCDs) and local coverage determinations (LCDs) to determine if the prescribed drug is covered under Medicare Part A or B. Additional links to Pub. 100 Part A/B guidelines, CMS transmittals, code-specific edits and revenue codes help you differentiate physician and hospital drug-billing criteria.

---

**DrugReimbursement.com delivers** the most up-to-date information available on essential FDA-approved drugs and related medical codes.

- Simplify drug searches
  - Increase accuracy
  - Reduce denials
- 

### Also available as an add-on

Seamlessly search and look up drug codes and content from one of our online coding tools (e.g., EncoderPro.com) for a streamlined workflow.

- **Monitor drug payment and AWP data.** Current average wholesale package and unit pricing, Medicare Part B average sales price (ASP) and hospital APC/OPPS drug pricing information allows monitoring of drug charges, costs and expected Medicare reimbursement.
- **View up-to-date wholesale acquisition cost (WAC) data.** Current WAC “list price” reference provides hospitals with reasonable reference pricing.

**Flexible search capability.** Simplify drug searches with flexible capabilities that help you find drugs by CPT® code, HCPCS Level II code, NDC, drug name (brand or generic), ICD-9-CM/ICD-10 code and by manufacturer.

**Customizable dashboards** allow you to select and display key data elements and drill down to more detailed information in an easy-to-read grid format.

**Code and drug detail views** make it easy to identify new codes, established codes and not-otherwise-classified codes and their NDCs. A listing of applicable HCPCS Level II codes and CPT® codes with full descriptions are provided and linked to NDC codes for billing drugs and vaccines under Medicare Part B (hospital and physician).
